FYI: Long-format USB's do not play on all TV's with USB ports. They will play on computers just fine (both Mac & PC). IF you put the USB in your TV and it asks you to reformat it, DON'T. It will erase the recital on the USB. When it is asking you to reformat, it is telling you that it won't play that USB. Take it out and watch it on your computer or laptop. Both Windows and Mac can read from exFAT. You can also hot spot the USB from an I-pad like device or a laptop computer to any smart TV to watch it
